RESONANCE

It has been said that something as small as the flutter of a butterfly's wings can cause a raging tempest on the other side of the world. The butterfly's ostensibly insignificant breeze is magnified as it tips the steady state of the world towards a new reality.

Its effect, like a drop of water in the vast ocean, resounds through its surroundings and drives the chaos of the universe. The presence of limitless choices and variables exponentially multiplies the disruption, the disorder, of a system constantly deviating from equilibrium.

And within that continual flux, there exists a web of infinite probabilities. A web upon which our ideas, the only waves capable of transcending space and time, abound and resonate, setting off a host of new possibilities that we can collectively collapse into reality.

From Martin Luther King Jr's impromptu "I Have a Dream" speech on the steps of the Lincoln Memorial to +Dr. Alexander Fleming's unexpected discovery of penicillin that revolutionized medicine, Resonance has defined our reality, with one butterfly's flutter after another.

Let's find your flutter at TEDxUTAustin.

The bigger the idea,

x=independently organized TED event

In the spirit of ideas worth spreading, TED has created a program called TEDx. TEDx is a program of local, self-organized events that bring people together to share a TED-like experience. Our event is called TEDxUTAustin, where x = independently organized TED event. At our TEDxUTAustin event, TEDTalks video and live speakers will combine to spark deep discussion and connection in a small group. The TED Conference provides general guidance for the TEDx program, but individual TEDx events, including ours, are self-organized.

This independent TEDx event is operated under license from TED
